

AMENDMENTS TO THE CLAIMS

1. (currently amended) An A woven awning fabric, ~~wherein it is made from comprising substantially entirely wet-dyed polyester (PES) filament yarn (continuous filament yarn) and/or polyester monofilament yarn.~~

2. (original) An awning fabric according to claim 1, wherein it has a weight per unit area of 200 to 250 g/sqm.

3. (currently amended) An awning fabric according to claim 1, wherein ~~it is said wet-dyed, particularly by means of~~ yarn is dyed with an anthraquinone-based disperse dye.

4. (original) An awning fabric according to claim 1, wherein a UV block is provided.

5. (original) An awning fabric according to claim 4, wherein the UV block is triazine-derivative based.

6. (original) An awning fabric according to claim 5, wherein the polyester yarn is round.

7. (currently amended) A method for producing an awning fabric according to claim 1, ~~wherein it is woven from~~ wet-dyed polyester filament yarn and/or polyester monofilament yarn.

8. (canceled)

9. (original) A method for producing an awning fabric according to claim 7, wherein it is set in a tenter at a temperature of approximately 185°.

10. (original) A method for producing an awning fabric according to claim 7, wherein titanium dioxide is introduced into the filament as a delustrant and lubricant in a quantity of less than 0.05%.

11. (currently amended) An awning, ~~particularly an awning with articulated arms or a sun room awning~~ comprising an awning fabric according to claim 1.

12. (new) The awning of claim 11 which is a sun room awning or an awning with articulated arms.

13. (new) An awning fabric woven of polyester filament yarn having a round cross section and containing an amount no greater than 0.05% of delustrants and lubricants, said polyester filament yarn being a continuous filament yarn and/or a monofilament yarn, said fabric having a weft density of 35-50 filaments per cm, a warp rate of 20-25 filament per cm and a weight of 200-250 g/sqm.

14. (new) The awning fabric of claim 13 wherein said polyester yarn is wet-dyed with a nitro dye, an azo dye or anthraquinone dye and contains a triazine based UV block.

15. (new) The method of claim 7 wherein said yarn contains an amount of delustrant and lubricant no greater than 0.05%, and is wet-dyed in a dye bath of a nitro dye, an azo dye or an anthraquinone dye, said dye bath further comprising a triazine based UV block.
